#### FAMILY

- Effect on Wife & Friends

#### MENTAL HEALTH

- Coping with injury
- Life now
- Prescription Drug Dependency

#### COMMUNITY

- Work Safe investigation
- Complacency
- Workplace Culture

Alan Newwey had his right arm ripped off by a conveyor belt!

Alan was doing a task that he had done many times before! But a few wrong decisions caused him to lose his arm.

Alan speaks from the point of view of an injured worker and gives a real insight into what happens to you and the people around you during and after such a devastating experience.

Alan is extremely honest about the issues and effects of a workplace incident and his presentation not only addresses the sequence of events leading up to his injury but the flow-on effects he experienced after getting hurt at work, including his battle with prescription medication.

Alan will give your employees a 'Wake up' call & will ask them to think about their responsibilities and reinforce how complacency can change your life!
